SOFTWARE TESTING PRACTICAL REPORT

PR-15 | Selenium WebDriver Automation Testing

Student Name	Bhavesh Patil
Enrollment Number	2504030100419
Course / Semester	BCA – Semester 3
Practical	PR-15
Application Under Test	SauceDemo (https://www.saucedemo.com/)
Tools Used	Python, Selenium WebDriver, Chrome, PyCharm

Practical Overview

This practical demonstrates automated authentication testing on the SauceDemo website using Selenium WebDriver. The test flow covers browser setup, login, product-page verification, and handling test outcomes. Screenshots supplied for this report are included as visual evidence.

Aim

To perform automated web testing with Selenium WebDriver and document the observed application behavior through screenshots.

Software and Requirements

- Python installed and configured in the PyCharm project.
- Selenium WebDriver package installed.
- Google Chrome browser available.
- Internet connection to access SauceDemo.

Test Coverage

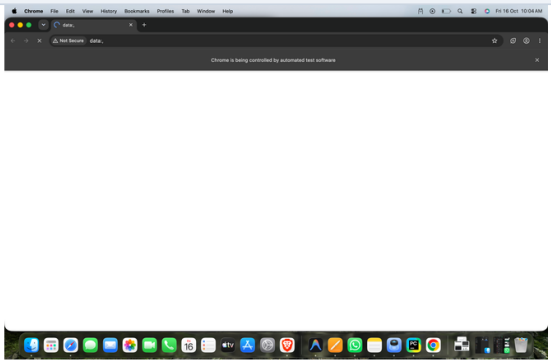

Test area	Expected behavior / verification
Browser launch	Chrome opens under Selenium control.

Test area	Expected behavior / verification
Website navigation	SauceDemo URL is loaded.
Authentication	Valid credentials reach the inventory page.
Product page	Inventory products are displayed.
Evidence capture	Screenshots document the browser and code execution context.

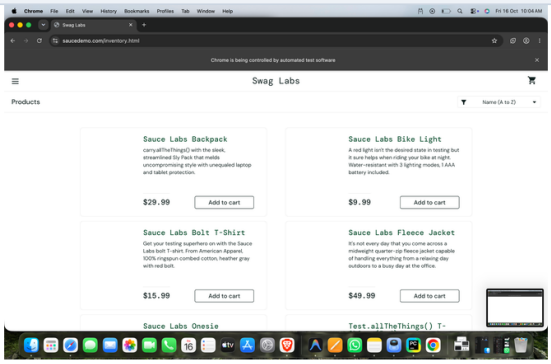

Execution Evidence

The supplied screenshots show SauceDemo inventory pages and the PyCharm Selenium script. One screenshot also displays a Chrome password-manager warning; this is a browser notification and not part of the SauceDemo application itself.

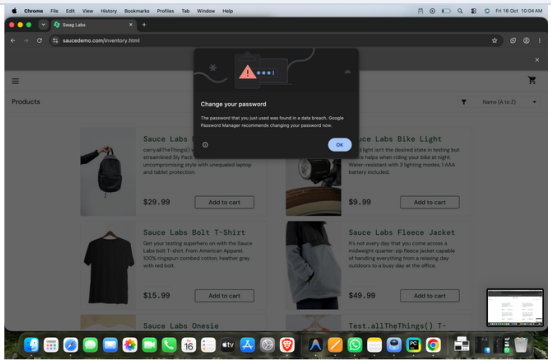

Screenshot Collage

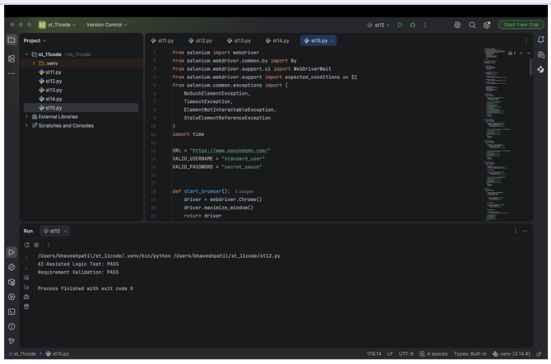

Screenshot 1: 10.04.39 AM.png

Screenshot 2: 10.04.42 AM.png

Screenshot 3: 10.04.47 AM.png

Screenshot 4: 10.05.07 AM.png

Result and Conclusion

The visible evidence indicates that SauceDemo's inventory page loaded successfully in Chrome under automated control. The screenshots provide supporting documentation of the browser state and Selenium code. A complete pass/fail status for every individual test case should be confirmed from the run console output.

Note: The screenshots supplied do not show a full PR-15 test-results console, so this report does not claim that all five tests passed.
